ONCAM

Oncam Global Group was founded in 2007 and is headquartered in Switzerland with regional offices in Iraq, UK, US, Turkey and the Middle East.

Oncam Global designs, develops and deploys Total Security Solutions that provide superior operational readiness to maximise prevention and response. Whether for critical infrastructure, city surveillance, commercial, governmental and institutional assets or the home, Oncam has the experience and expertise to meet every security challenge.

### Critical Infrastructure and City Surveillance Experience

The last few years have demonstrated to governments how finite their resources are and how dependent

Oncam leads the way in surveillance technology

their societies are on the continuous delivery of essential services (delivered by the communications, emergency services, energy, finance, food, government, health, transport and water

sectors). Without these services, any state could suffer serious consequences, including economic damage, social disruption, or even large-scale loss of life.

Oncam understands the protection of critical assets and the security and the safety of the citizens of Iraq is of paramount importance. Oncam leads the way in surveillance technology and the protection of critical infrastructure and following a thorough risk assessment, can design and implement a modern, intelligently integrated technology-based solution.

### Experience in Iraq

While reconstruction efforts have produced some successes, problems have arisen in the past with the implementation of

internationally funded Iraq reconstruction efforts. Many suggest that the reconstruction efforts

were hampered by a poor

they understand the country and the culture of Iraq.

understanding of Iraq on the part of the international community assisting with the reconstruction.

The Oncam senior management is Iraqi and they understand the country and the culture of Iraq. Oncam has the global experience and market-leading technology to provide a secure solution that will deliver operational efficiencies and meet the most rigorous standards set by the Government and citizens of Iraq.

## a sustainable security solution

In this new positive era of regeneration and rebuilding, the citizens of Iraq can look forward

to a safer and more secure environment. The redevelopment of deteriorating infrastructure and improved basic utilities presents new opportunities for Oncam to partner with the Government and Citizens of Iraq to provide a sustainable security solution that demonstrates Oncam's understanding of the country and its commitment to the region.

### The Oncam Difference

Oncam's success will depend on the professional implementation of a security solution to provide the latest surveillance and monitoring to protect critical assets in Iraq.

recognised as the global industry leader

The cornerstone of the Oncam security solution is a unique process that enables video surveillance, automatic acquisition and tracking of 'suspicious' behaviour and the interrogation and verification of a potential threat. This in-turn provides the necessary intelligence needed to make a measured response to any situation to potential threat. The unique line of IP 360° cameras used in this process utilise award-winning technology that is recognized as the global industry leader.

But we are more than just words on a page and our worldwide projects are a testament to this. Our customers matter to us and we have built long-standing relationships with many
